

AUSTRALIAN OAK

ASH

# Trends change, quality doesn't.

Australian Oak is your answer to an Australian  
grown and coated engineered floor.

Australian Oak colour: 30% Black

## Fully customisable engineered flooring

We've combined beautiful, sustainably managed Victorian ash with an innovative LED coating and a super stable substrate, manufactured to the quality you'd expect from Australia's leading hardwood manufacturer. The result is a floor of stunning architectural appearance that increases stability

and speeds up installation, offering a financial saving in both timber and materials. The customisation of the floor is done in a logical five-step process starting with the size of the board, appearance grade, surface texture, colour and gloss level. Making your experience as simple and enjoyable as possible.

## A premium LED coating that will floor you

Beautiful and durable is one thing. Unbeatable maintenance is another. LED-cured hardwax oils are a revolutionary, high traffic oil that cures instantly under LED light. This is unheard of for most on-site coating

systems and the benefits are far greater than first imagined. Floors can be re-coated without having to vacate the house and commercial spaces can be re-coated without a fear of closed business.

### AUSTRALIAN OAK BENEFITS

BALANCED CONSTRUCTION

EASY TO LAY

FOOD SAFE HARDWAX OIL

CAN SAND AND RE-POLISH

25 YEAR STRUCTURAL WARRANTY

INCREDIBLY STABLE

CROWN CUT
