As beautiful as it is durable,  
and guaranteed to perform

## IronOak. The answer to your exterior timber needs.

There's nothing like the warmth and beauty of timber. It's natural, sustainable and durable which is why we've created IronOak, a combination of Glacial Oak and a H3 water-based treatment to bring you a hardwood option specifically designed for outdoor applications. IronOak is the perfect choice for those after a blonde, crown-cut exterior timber that is capable of uplifting any façade, all whilst withstanding the diverse local climate at a surprisingly affordable rate.

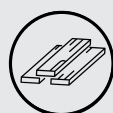

### Why IronOak?

Treated to H3 classification (per AS1604 Specification for Preservative Treatment), IronOak is handpicked by region and colour, graded and processed to exceed Australian standards and supplied in small, manageable packs. Designed to match our internal Glacial Oak range for a continuous flow of timber design, IronOak is vastly available in a variety of cladding, batten and screening profiles.

We take pride in delivering hardwood products that not only meet but exceed expectations, which is why we offer a 25-year guarantee against exterior timber decay and termites for all IronOak products.

### IronOak Benefits:

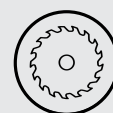

Blonde colour

Straight cut boards

Fully treated

Easy to work, cut & build with

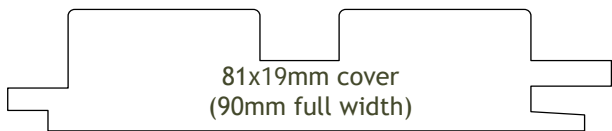

Stable ongoing supply

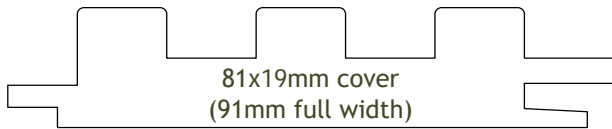

25-year guarantee

# IronOak Cladding

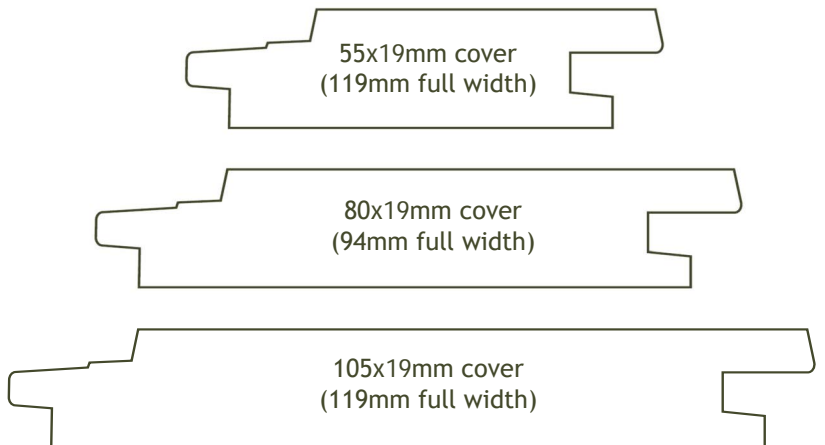

## 2 Batten Castellated Mould

## 3 Batten Castellated Mould

## Shiplap Cladding

Lengths: Random length end match

## Easily stain IronOak to suit design requirements

IronOak is specifically hand-picked by region and colour to give you a consistently blonde appearance that can be easily stained to suit a specific design intent and accepts all types of oils. Get in touch with an IronOak specialist to learn more about pre-oiled options.

Swatches are an example of colours that can be achieved using IronOak.

## Create a seamless flow of design with Glacial Oak

We understand the importance of creating a cohesive and consistent design flow which is why IronOak has been designed to pair with our internal Glacial Oak range for the perfect match in timber applications. Whether it's staircase components, benchtops, flooring, lining, DAR & sawn or windows and doors, Glacial Oak offers a wide selection of products that complement IronOak cladding, batten and screening profiles.
