

MACHINE OPERATORS

Australian Sustainable Hardwoods (ASH), located in Heyfield, is Australia's leading hardwood timber sawmill and manufacturer with a reputation for innovation, quality and sustainability. With over 30 years' experience, ASH operates 13 processing and manufacturing centres.

As we continue to grow our plantation hardwood processing capacity and the range of products produced, we're seeking motivated people to join our team. A variety of roles are available including machine operators, labourers, machine technicians, carpenters and joiners.

ASH is an active member of the local Heyfield community and a regional employer of choice in Central Gippsland. As a thriving and growing business, we offer stable, ongoing employment.

ASH operates a nine-day fortnight, providing employees with regular long weekends allowing them more time to relax, recharge and pursue personal interests. We take the health and safety of every employee seriously. We have a dedicated, onsite exercise physiologist available to all employees to support physical well-being. We also offer access to counselling services to support mental health. Furthermore, we facilitate organisation-wide health and safety by being a drug and alcohol-free workplace with pre-employment and ongoing random drug and alcohol testing.

Opportunities for personal growth and development are additional benefits of working at ASH with access to trade and other vocational training.

To excel at ASH, you will be committed to workplace safety and the wellbeing of yourself and colleagues. You will have the ability to work as part of a team that identifies improvement opportunities, listens and talks honestly about them, and finds ways to do things better every day. Skills we are seeking include problem solving, a focus on improving operating outcomes, mechanical aptitude, and consistency.

Whilst not essential, experience in a manufacturing or timber processing environment is beneficial, as is holding a current forklift license. An understanding of how machines work and some basic maintenance skills is highly desirable.

If you are looking for a change of role, or a new opportunity, send your CV and cover letter to jobs@ash.com.au by Monday December 2, 2024. To learn more about ASH, visit ash.com.au.
